Innovative
and flexible

02 | CONTENTS

Moduflex® is an exciting innovation in portable accommodation, providing enviable flexibility, creating a wide choice of building designs to meet your individual accommodation requirements. They can be used for a multitude of functions including open plan offices, sales centres, event and welfare facilities, and are available for short and long term hire instantly - nationwide.

MODUFLEX® AN INTRODUCTION

Moduflex® provides:

- A wide choice of building designs
- Choice of changeable wall panels
- Available up to three storeys
- Variable internal layouts
- Quickly and easily installed on your site
- Optimum footprint size
- Suitable for short or long term hire

Market Sectors

Moduflex® is suitable for a variety of applications. We have provided buildings to a number of sectors:

- **Construction** - offices, welfare facilities, canteens, turnstiles
- **Sports & Leisure (for temporary use only)** - hospitality suites, ticket offices, offices, changing rooms
- **Hospitality** - kiosks, offices, marketing suites, kitchens
- **Events** - turnstiles, ticket booths, corporate hospitality suites, kitchens

Our standard range can be used for a multitude of functions and can include offices, canteens, welfare facilities, toilet and shower rooms and changing facilities.

Each Moduflex® bay is 6.0m x 3.0m and as standard, comes with the following features:

- Double glazed windows - providing a reduction in heating costs
- Internally operated roller shutters to promote a more secure environment
- Dual flush toilet cisterns & non concussive push taps to all cold water supplies - reducing unnecessary water costs and consumption
- Thermostat & timer controlled electric heating with optional dual AC units providing ambient and pleasant temperatures
- Energy efficient lighting with PIR sensors - saving on preventable energy costs & usage
- Waterless urinals.

No other relocatable building offers the flexibility provided by Moduflex®

MODUFLEX® AN INTRODUCTION | 03

WELFARE APPLICATIONS

The provision of a comfortable and clean environment for your employees reflects on their performance and your company image.

Elliott Moduflex® is the perfect product choice for your relocatable welfare facility. With a huge selection of standard welfare layouts Moduflex® can easily be integrated as the ideal solution within your office facility. Alternatively Moduflex® can be supplied as high quality and robust individual welfare units to suit any site set-up and to accommodate any amount of site personnel.

The Moduflex® welfare range includes full commercial kitchens and food preparation areas, canteens, locker rooms and toilets, showers and changing/drying rooms, or just about any other specialist use tailored to meet your on-site needs.

The Moduflex® welfare range provides you with all the facilities you will ever need to satisfy your welfare requirements and can be installed and on-site in unrivalled timescales. A whole range of optional extras are also available for you to choose from including shelving, specialist locking, fire fighting equipment, building wraps, canopies, etc.

A comfortable, robust and fresh welfare facility, flexible enough to allow you to create and configure any layout, to any footprint size and with the design capability to be stacked up to three storeys high as standard.

Appearance

➤ 9

➤ 10

➤ 10F

➤ 10RH

➤ 17

We also have a range of single 'stand alone' welfare modules that can be used individually or joined together to create a modular solution.

Kitted out with the latest eco-friendly features such as waterless urinals and non-concussive push taps, you can be assured that not only are you providing the highest quality welfare space for your work force but you will be using a facility that reduces your utility costs and has less impact on the environment.

This Moduflex® welfare solution provides you with a cost effective, eco friendly, fast delivered, modern and fully flexible welfare space that will suit any size of work force.

Each standard pre-defined Moduflex® welfare building is nominally 6.0 x 3.0m and is designed in a variety of configurations to meet the demands of any site welfare application.

➤ Layout Options

9	3 WC's c/w wash trough and extended urinal bank
10	5 WC's (1 ambulant) c/w wash trough and urinal
10F	5 WC's (1 ambulant) c/w wash trough
10RH	5 WC's (1 ambulant) c/w wash trough and RH disabled access toilets
17	3 shower block c/w changing and drying areas

Please contact us on **01733 282 477** for further information and prices on the single Moduflex® welfare range.

NOTE: Drawings shown for illustrative purposes only and may be subject to change.

SINGLE TOILET EXAMPLES

LAYOUTS & FLOOR PLANS

Cost effective, variety and flexibility

OFFICE APPLICATIONS

Elliott Moduflex® is the flexible solution for all your office requirements, whether you are looking for a single office building or a large open plan complex. Moduflex has a larger ceiling height than most other equivalent building systems, giving you a light and airy environment.

The advantage of Moduflex® is that it can be easily stacked and linked to create large, open spaces up to three storeys high. The variable wall, window and door panels mean that endless layout options are available to you.

If site security is of paramount importance, we can provide a turnstile entry system which comes complete with a separate security office, to offer peace of mind and safety for your workforce.

We can provide a whole host of welfare facilities to complete your temporary office accommodation including canteens, toilets and showers, kitchens and changing facilities.

Our office complexes are available complete with energy saving eco options as standard and can be used as board rooms, training facilities and meeting rooms, making Moduflex® the first choice for your relocatable office accommodation.

Flexible
open space

Optimised working environment

06 | OFFICE

Elliott Moduflex® understands the importance of managing crowds for the safety of both the public and your employees. We offer a range of relocatable buildings to assist with the control and management of crowds and traffic which includes a turnstile entry gatehouse and multi windowed ticket offices.

CROWD CONTROL APPLICATIONS

Our Moduflex® ticket offices are available in a range of sizes to suit everything from a large sporting event to a small local show. Glazed windows can be fitted to both or just one of the long sides, whichever best suits your requirements. This allows several people to be served at once, offering a smooth service and reduced queuing time. Each window is fitted with a speak hole for the security and comfort of the ticket office staff.

The Elliott Moduflex® turnstile gatehouse is available in various sizes. It comes complete with a full height steel turnstile giving access to approved users and can be used in conjunction with biometric access control.

- Choice of layouts
- Controls and restricts access to your site
- Full ceiling to floor personal turnstile fitted as standard
- Separate room can be used as First Aid, visitor reception, office or induction centre
- Stop unwanted visitors
- Control visitors to your site
- Security office with window included to check visitors credentials.

For safer crowd management

EVENT APPLICATIONS

Elliott Event Hire offers the widest range of products, readily available for all types of events no matter how big or small. These relocatable modular buildings are available in a variety of designs, up to three storeys in height and can be fully glazed with multi-sided viewing balconies for maximum visibility of the event, whilst offering comfort and style to your VIP guests.

With years of experience, our specialist events team can design tailor-made solutions to meet your individual requirements and budget, for everything from a small outdoor show to major sporting events and Christmas festivities. We'll work with you to make your event a success, ensuring the strictest timescales are met.

Our solutions include welfare facilities, kitchens and catering equipment, crowd and vehicle control and relocatable buildings.

Our clients include:

- Monaco Grand Prix
- Chelsea Flower Show
- Ryder Cup
- Open Golf Championships
- Roland Garros French Open
- Brit Awards
- Epsom Derby
- Glastonbury
- Royal Ascot
- French Open

The flexible nature of these buildings enables us to offer you a bespoke service which can incorporate a relocatable kitchen, dining room, relaxation area, office, meeting room, viewing balcony, storage, and staff welfare facilities.

Your event
World wide support
World class service

08 | EVENTS

Increased ceiling height for a better environment

Using the latest design and technology our kitchens and equipment offer the maximum versatility in terms of bespoke relocatable configurations, whether you require production and preparation, kitchens, dishwashing units, relocatable cold rooms and dry stores, or dining/office facilities. Elliott Event Hire is the UK's foremost supplier of relocatable kitchens and catering equipment to professional caterers across all industries.

KITCHEN APPLICATIONS

The Moduflex® relocatable kitchen has proved a popular choice in many different sectors such as Education, Prisons, Healthcare and Defence, as well as the Construction Industry and Events market.

Our unique modular design means that it is available either as a single stand-alone unit, or if larger areas are required it can be easily linked together with other Moduflex® units to form a commercial kitchen of over 1000m² containing production, preparation, dishwashing and canteen areas.

The standard kitchen offers a wider than average working area with a generous 6m x 3m size, as opposed to our competitor's 2.65m width, providing you with valuable extra kitchen space. It even has the ability to be stacked, so multi-storey buildings are available.

Once you have selected your Moduflex® relocatable Kitchen unit, choose your catering equipment from our extensive range of products. Any combination of

kitchen and catering equipment may be used to create a kitchen that suits your individual requirements - giving you complete control and flexibility. Alternatively, simply order one of our proven standard kitchen layouts.

All our relocatable kitchens are designed and manufactured in accordance with current British standards and conform to the latest Health and Safety requirements. Our relocatable kitchens are equipped with food safe walls and ceilings, and come with non slip vinyl flooring.

Our Moduflex® relocatable kitchens provide an ideal solution to a variety of catering requirements:

- Relocatable kitchen facilities
- Construction site catering
- Decant catering facilities during refurbishment
- On-site event catering
- Emergency planning
- Contingency due to fire or flood

Providing equipment to professional caterers across all industries

The UK's
foremost supplier

DESIGN TECHNICAL DATA

Moduflex® offers:

- A wide choice of building designs
- A choice of changeable wall panels
- Available up to three storeys
- Variable internal layouts
- Quickly and easily installed on your site
- Optimised footprint size
- Ideal for a variety of sectors
- Increased ceiling height

WINDOWS

PVCu windows

- Double glazed 4-15-4 low emissivity glass
- Trickle ventilation
- Tilt and turn (inward opening)
- Integral shutter, fitted as standard
 - The shutter is operated from inside the module

Standard sizes available:
900 x 1000mm (clear glazed)
900 x 400mm (obscure glazed)

DOORS

Primary entrance

- Light grey pre-painted steel, bonded to a rockwool insulated core. The door leaf is then hung into a 2-piece welded steel doorframe with a powder-coat finish
- Integral double seals are used to achieve a high level of weather & draft resistance
- Aluminium lever handles, europrofile thumbturn cylinder and heavy duty stainless steel hinges.
- Thermal insulation achieved by the door leaf is 0.79 W/m²K

Other door fittings (where relevant)

- Vision panels
- Door closers
- Panic bars

Flexibility
to grow your workspace

Light grey external colour scheme

10 | DESIGN - TECHNICAL DATA

Basic building specification:

- 2.5m ceiling height
- External colour scheme light grey (RAL7035)
- Floor load capability 2.5 kN/m² load
- Fire rating: Class 'O' surfaces throughout
- Standard Moduflex® wall 'U' value 0.584 W/m² K

DESIGN TECHNICAL DATA

DESIGN - TECHNICAL DATA | 11

Moduflex®
Spacious, light and airy

DESIGN TECHNICAL DATA

Building Services

- Electrical installation - twin and earth PVC insulated cables concealed within the corner cover (as standard). High level perimeter PVC trunking fitted (where required) with associated drops to surface mounted items, if agreed.
- Heating requirements - 2kW electric convectors complete with timer (as standard), controlled by internal thermostats and local isolation. Quantity is dependant on room size.
- As an 'optional extra' air conditioning can be offered. These are generally a low-level 'mono' system that vents the air upwards within the room.
- Sockets and spurs fitted to corner covers (as standard).

Water Regulation
Advisory Scheme
approved services

Light grey external colour scheme

12 | DESIGN - TECHNICAL DATA

- Circuits are wired to a 'ceiling mounted' consumer unit which feeds into an external high level mounted isolator ready for connection to an electrical supply, provided by others. Consumer unit fitted at high level at one end of each module.
- Mechanical ventilation installed within toilets, showers and general ablution areas, designed in accordance with building regulations. Provision by the means of through the wall fans, sized appropriately to offer the required air changes.

• **WRAS (Water Regulation Advisory Scheme) approved services.**

- Water heating - Instantaneous or storage type electric water heaters. Water is stored at 65 degrees to avoid contamination of legionnaires.
- Waste pipes and traps shall be from PVC and carried to one or more outlets usually through the wall, ready for connection by others on site.
- Plumbing - Plastic feed pipes of suitable diameter and appropriate fittings.

DESIGN TECHNICAL DATA

WALL PANELS

- 0.45mm honeycomb 'laquer coated' steel outer lining (RAL 7035) Light Grey
- Standard Moduflex® 55mm insulation core
- 0.45mm honeycomb 'lacquer coated' steel inner lining (RAL 7035) Light Grey
- Standard Moduflex® 'U' value of 0.538W/m²K

CEILING AND ROOF

- The dual pitched roof comprises of a warm deck construction
- 0.63mm thick profiled galvanised outer roof sheets
- Ceiling - 0.5mm interlocking lacquered steel trays
- Insulation - 80mm glass fibre
- 'U' value of 0.439W/m²K

FLOOR

- Standard Moduflex® Insulation 60mm thick mineral wool / 'U' value 0.472 W/m²K
- Vinyl - Marble and wood effect, hardwearing homogeneous commercial floor covering
- Slip resistant vinyl - Heavy duty, decorative slip resistant floor covering
- Carpet - Heavy contract, 100% solution dyed nylon carpet tile
- 19mm moisture resistant particle board as standard.

All plumbing services are WRAS approved

Surpassing your
design expectations

TECHNICAL DATA

Simple, flexible
fast and eco-friendly

Moduflex® has been designed to provide a flexible and functional work space, and benefits from an insulated shell that offers a comfortable working environment. Our Eco-Moduflex® is designed to be even more thermally efficient and environmentally friendly with improved insulation, minimising heat loss.

The simplicity of the Moduflex® design means that wall panels can be easily removed, replaced and repositioned. The modules fit together in ultra fast time meaning your site can be operational even under the tightest time constraints.

You can simply expand your facility outwards and upwards where you need increased capacity, and fast. Moduflex® is the ideal answer to any relocatable accommodation requirement... clean, comfortable and cost effective.

> Layout options

- E2.4 6-person male toilet facility
(includes 1 wheelchair accessible)
- E2.5 11-person female toilet facility (includes 2
ambulant disabled & 1 wheelchair accessible)

Moduflex® modules designed for both construction and events use.

The illustrations show standard 'off the shelf' Moduflex® toilet facilities, available for immediate use on any construction site or at any event. These robust twin modules are fitted to the highest standard with facilities that can accommodate male, female or full and ambulant disabled users.

Each toilet is equipped with a variety of energy saving eco features which include waterless urinals, push taps and dual flush toilets, so you can be assured that your facility is friendlier to our environment and saves you money.

BRANDING BUILDING WRAPS

If you thought relocatable buildings were dull, then think again! Whether you want to stand out from the crowd or blend in with your surroundings, Elliott Customer Branding offers customised solutions that allows customers to promote and maximise their brand image, or integrate with their surroundings to increase acceptance within their environment.

Vinyl wraps can incorporate any graphical design and cover the exterior surface of the building. Benefits include:

- Two year guarantee
- Low maintenance
- Easy to restore back to standard unit
- Visually appealing

Our customised corporate wraps provide an impactful marketing solution on buildings which are easy to assemble, dismount and transport to new locations, ensuring that your brand image is seen time and time again. Ideal for:

- Corporate hospitality
- Large outdoor events
- National and international companies
- Event planners and promoters
- Blend in
- Discreet portable building exterior finishes

Colourful wraps can be used in all sorts of situations where it is important that the building does not impact detrimentally on the surrounding environment. Ideal for:

- Countryside locations
- Pre-schools
- Healthcare facilities
- Urban areas
- Sports facilities
- Construction sites

Customise
your building exterior

20 | BRANDING BUILDING WRAPS

All of Elliott's Moduflex® modules typically have the following items as standard:

► Air Force hand dryers
Reduces energy consumption as they rely on force rather than heat also preventing paper towel waste.

► PIR lighting sensors
PIR (Passive Infra Red) sensors are fitted to help reduce energy consumption ensuring lights are not left on unnecessarily.

► Internal lighting - Lighting is surface mounted energy efficient to suit VDU usage, low energy consumption with built in emergency lighting where applicable.

► Non-concussive basin mounted push taps
Prevents taps from being left running, reducing water usage and cost.

► Extractor fan covers
Colour coded to hide and protect standard louvers, improving the external appearance of your building.

► Dual flush toilet
Reduces water usage and lowers your utility costs.

► Standard toilet cubicles
High quality, robust and modern cubicles are fitted as standard.

► Electric convector heating
Provides adequate heat to all occupiable spaces for your comfort.

► Waterless Urinals
Stylish energy saving urinals that enhance the appearance of any toilet facility. Available in a range of colours and designs.

► Sinks
Modern trough style wash hand basins enhance the appearance of any toilet facility. Available in a range of colours and designs.

STANDARD FEATURES

OPTIONAL EXTRAS

All of Elliott's Moduflex® modules also have the following optional extras, allowing you to create your ideal environment:

► Security turnstile

A full height steel security turnstile allowing access only to approved users. Perfect where heightened security and access is required.

► Monoblock heat pump air-conditioning
Low level air-conditioning units provide you with heating and cooling for your comfort.

► Anti-bacterial door handles

Prevents the spread of harmful bacteria on a surface that is touched by everyone.

► Sun shading

Helps protect your building from solar gain and overheating by reducing glare resulting in greater energy saving.

► Heat recovery system

Provides sufficient ventilation to your work space without losing heat to the atmosphere thus minimising carbon emissions, saving you money.

► Fascias and wastebands

For longer term projects or where you require a more aesthetic appearance, an upper fascia and waistband is available. These cover any fork lift pockets and provide a more permanent and impressive aesthetic appearance.

22 | OPTIONAL EXTRAS

All of Elliott's Moduflex® modules also have the following optional extras, allowing you to create your ideal environment:

OPTIONAL EXTRAS

► Shelving

High load capacity per shelf with simple adjustment, floor fixing brackets are standard as well as "s" clips to prevent lift of bars for safety, perfect for use within a busy working environment. The standard frames are 2000mm high with a choice of 400mm/ 500mm or 600mm depths. They come in a variety of lengths allowing you to maximise the length of run into your available space.

► Fire suppression system

If you have an area where there is a particular heat source such as a kitchen, plant room or server room any fire outbreak can be instantly extinguished preventing further spread of flame and increased damage.

► Fire fighting equipment

Fire extinguishers, blankets, hoses, etc can be supplied and we can even arrange the service and management.

► Digital door locks
Mechanical or electrically operated door locks are available to allow access to areas for specified person improving your security.

► Fire alarm

Is fitted in accordance with BS839 Part 1, to help you escape promptly and safely from buildings in an emergency.

► Alarm system

Intruder and disabled refuge alarms are available.

► Kitchens

If you need a kitchen space we can provide a range of quality stylish kitchens to enhance and brighten your amenity area.

OPTIONAL EXTRAS

► **Building wraps** - Your building can be fully or part customised with your logo, colour scheme or mural using one of our building 'wraps'. If you want to add a splash of colour or create an area of visual interest this is the perfect solution. For more information on our building wraps refer to page 23.

► **Door closer**
High quality stainless steel door closers are fitted as standard where applicable.

► **Outside Decked Terrace**
On a two storey building we can offer a superb timber decked area. A perfect external space as a viewing platform, work space or amenity area.

► **Internal glazing**- Internal partition walls can be glazed allowing additional natural daylight, providing more desirable spaces. Glass can be etched, coloured, with bespoke manifestation to your preference.

► **Photo voltaic**
Has the potential to create 1890kW of electricity with annual generation (note - needs a utility supply). Another long term environmentally friendly and economical power solution.

► **External door canopy**
High specification and futuristic, solid powder coated steel design with a polycarbonate curved roof and side panels. These can be etched with your own motif/name.

► **Solar panning**
Produces electrical power for water and space heating. A long term environmentally friendly and economical power solution. Typical annual saving of 70-80%.

HUBBA WIRELESS COMMUNICATIONS

Wireless communications
where none exist

An innovative accommodation solution

Remote wireless wifi

A technical solution that provides you with a quick land line telephone and PC connection in an office, even if you have no IT infrastructure.

The Hubba 3G broadband simply plugs into your mains supply and delivers high speed broadband within minutes. Ideal for temporary office structures, temporary back-up solutions for failed broadband and phone connections, disaster recovery and rural locations.

The Elliott instant office comes in a briefcase complete with:

- An Elliott bespoke and branded communication 'Hubba' unit
- A land line hand set (with your unique land line telephone number)
- The correct cables to complete the installation
- 5Gb of free download capacity per month (additional download bundles can be ordered as required from our network partner via the telephone using a credit card)
- Access to a free telephone hotline for problems/queries
- Simple instructions.
- Installation takes 5 minutes

What the Hubba can provide:

Through a 3G sim card permanently installed in the Hubba unit.

- 1 off Telephone land line
- 1 off PC internet connection—hard wired
- 2-6 off WIFI PC connections (depending on usage)

The Hubba has 95% coverage of the UK (better than any of the popular mobile telephone networks) but must be within 25 kilometres of a communications mast.

Customer helpline for technical & connectivity queries and data bundles call: 0808 168 4064

26 | HUBBA WIRELESS COMMUNICATIONS

World leader in volumetric space and secure storage solutions. Our reputation has been built in providing the very highest levels of customer support to enhance our market leading position.

Maintenance

As soon as we receive your order you become part of a highly efficient schedule that has been practised in Elliott for many years. Whilst Elliott products are on hire/lease to you we will carry out any maintenance to ensure your continued comfort and safety.

We have 100+ engineers in all locations of the country ready to respond to any maintenance or repair request. GPS tracking is fitted to all vehicles ensuring that your maintenance or repair request can be dealt with as quickly and efficiently as possible. We strive to ensure total customer satisfaction and take personal responsibility to ensure it is achieved.

Repairs

From time to time you may need repairs carrying out on your hired/leased products due to a variety of reasons including vandalism or accidents by your own staff. In these instances Elliott Customer Services are readily available to complete any repairs.
